

WORKSHEET

Potential revenue from phone calls.

Your business.

Receives an average of 10 calls per day but you only answer 7 of those calls.

Statistically, only 29% of those calls will result in a sale. Now, multiply .29 by the total answered calls to get your potential daily conversion rate.

..... $29 \times 7 = 2.03$

With 261 weekdays in each year, multiply your conversion rate by 261 to get the total number of sales you earn each year.

..... $2 \times 261 = 522$

Now, multiply this number by your average profit per sale to find your current revenue from answered calls.

..... $522 \times \$500 = \$261,000$

Now, imagine being able to answer 100% of the calls that come in!

YOU'D BE EARNING AN ADDITIONAL
\$113K
IN REVENUE EACH YEAR

Stop spreading yourself thin! the Receptionists are top-rated for a reason and we're standing by to help you grow your business. Trusted by thousands of companies to deliver wow-worthy customer experiences, the Receptionists is all you need to get the freedom to focus on running your business, one call at a time.
